

**williamswoodward** specialise in the provision of project management and consulting solutions.

Our skills and strengths are working with people to maximise the use of IT business systems and technology.

With a background in finance and accounting we have a proven track record in successfully developing business strategy and providing project management services for business system implementations and system/business improvement.

We have built an in-depth understanding of the critical success factors which affect each stage of a project and have used this first hand knowledge to develop the 'Doable Project Management' training programme.

# doable project management

## team building strategy

### Overview

An education process to organise project teams and ensure they are ready to implement a new business system with confidence.

Doable project management provides a people orientated service in a systems-orientated environment.

### Objectives

Build the foundations for success with a structured approach to a new implementation project.

Develop an appreciation within the core team of the importance of a good supplier relationship, a practical, structured approach and realistic planning.

Enable project managers and their teams to be proactive about the way in which they plan, develop, implement and manage throughout the project lifecycle.

### How

A one day interactive workshop session with the Project Sponsor, Project Manager and all team members will take you through the principles of 'doable project management' to achieve a successful project with minimum stress.

### When

Prior to the start of a new business system implementation to achieve maximum benefits.

### Why

Doable Project Management lays firm foundations for a project by introducing a structured approach that allows stakeholders and project teams to focus upon what makes a project doable, such as:

- Board level sponsorship and support of the project
- A skilled and experienced team
- A well prepared project team in the primary stages
- Good team relations
- Excellent communications
- Good supplier relationship

### Benefits

- Structured and knowledgeable start to project
- Well prepared project team with a practical approach
- Well defined project scope which is doable
- Successful project delivered on time and to budget
- Control over project implementation – eliminate wasted time and money in project correction
- Increased communications and improved resource efficiency through teamwork
- Happy and motivated project team at all times
- Mitigate risks and maintain a clear plan to manage change from both a product and cultural perspective
- Enhanced relationship with supplier
- A practical approach applicable to all projects
- Reduction in external consultancy costs

### Proven approach

*"I was delighted with both the Doable Project Management module and the overall experience with williamswoodward, it helped kick-start our Agresso 5.5 project and truly empowered our relatively inexperienced Project Manager."*

**Matthew Gibbons**, Deputy Director of Finance, Luton and Dunstable Hospitals NHS Trust.

*"The professional assistance that Bigen Africa received from williamswoodward paved the way for a successful implementation of the Agresso business solution."*

**Francois Swart**, CEO, Bigen Africa, Pretoria, South Africa

*"Avoid frustrations, always view the big picture"*

*"Experience has taught us to take responsibility and make decisions, avoid issues by foreseeing them and quickly solve the problems that do arise"*

*"One of the most important factors in a successful business system implementation is the relationship between the customer and supplier."*
