

Exciting partnership to bring cloud-based ERP to UK market

Press Release Jan 2013

Xledger Limited and Williams Woodward Limited announce dynamic partnership bringing together product innovation and project experience to provide a total ERP solution with its associated benefits.

Xledger Limited, author of the innovative Xledger cloud-based financial management system partners with Maidenhead based consultancy Williams Woodward Limited to promote, implement and support Xledger.

The Xledger system is a complete, web-based finance, project and business information system. Delivered as software as a service (SaaS) application it reduces infrastructure and on-going costs, allowing executives to focus on business issues and make decisions with real-time information.

Norwegian based Xledger Group, founded in 2001, has over 3500 customers and is ranked as number 247 in Deloitte's latest list of fastest growing technology companies across EMEA with a growth rate of 669%.

Williams Woodward Limited is an independent consultancy with a proven track record in providing project management and consulting services for UK and international businesses in a variety of market sectors. Offering a wealth of experience gained from many years of implementing business software and managing change across organisations of all sizes means that Xledger clients will gain the full benefit from their system implementation.

Knut Ronning, Managing Director at Xledger UK says *"We are very encouraged to work with williamswoodward to expand Xledger in the UK market."*

Having previously worked together, it is this long-term link that brings the Williams Woodward and the Xledger management teams together once again.

Andrea Williams, Managing Director at williamswoodward says *"The power of cloud-based systems such as Xledger is already widely recognised allowing companies, including ourselves, to have access to current financial and business information 24/7 - rather like walking around with your latest balance sheet in your pocket."*

Jo Sutton, Bristol based Head of Operations at Xledger UK confirms this positive view. *"Successful partnerships are dependent on a mutual understanding of each organisations business values and objectives. Our relationship with williamswoodward will be a fundamental part of our business strategy and this will be of benefit to ambitious organisations looking for a finance system that will continue to support them as they grow."*

About Xledger

Xledger is a web-based management system, designed to be delivered as a true software as a service (SaaS) application, for medium sized, dynamic businesses that are looking for tight control of their finance and projects. The system provides an instant view of business transactions and accurate cash flow position, owing to its automatic link with banking systems. Essential business information is immediately available, in a personalized format via any internet browser, whenever and wherever it is needed. Xledger removes the hassle and costs generally associated with traditional ERP systems.
