williamswoodward

About us

Williams Woodward is an independent consultancy with a proven track record in managing finance and ERP projects. We provide project management, training, technical and business consulting services across a number of market sectors.

We are an accredited and preferred implementation partner of Unit4, implementing Unit4 Business World (U4BW), formerly known as Agresso, and an accredited re-seller and implementation partner of Xledger business software.

Our service offerings are based on in-depth knowledge and lessons learnt from many years of experience of implementing U4BW and managing change across organisations of all sizes.

Improving the U4BW user experience

As an accredited and preferred partner of UNIT4 we now provide a unique Agresso training course 'Improving the User Experience' from our state of the art training centre in Maidenhead, approximately 30 minutes from London.

- Involve your staff in the system they are using
- Inspire them to use the system
- Invest in their development with Williams Woodward training

The training is specifically aimed at improving the usability for users in U4BW, and also Super Users who want to develop their system further.

Are your users getting the best out of U4BW?

To maximise the return of investment in your U4BW system, you need to ensure that it is continuously developed to meet new demands of the business and stakeholders as well as achieving on-going business process improvements. One of the biggest benefits of U4BW is its inherent flexibility which means that it can be enhanced without bespoke development. However, you need the knowledge of how to achieve this.

Our customers have regularly been requesting assistance from us to develop and enhance their U4BW systems and improve the user experience. Based on this feedback we have now developed a training course that will provide you with knowledge of the tools that are at your disposal in U4BW.

The course will cover:

- Common
- Self service
- Financials
- IntelAgent
- Logistics
- Reporting
- Systems Administration
- Technical
- FAQs – knowledge share

The training course can be run against a Milestone 4 system upwards.

Benefits

By the end of the course you will:

- have obtained knowledge to improve the look and feel of U4BW for all your end users
- understand more about the 'hidden gems' in U4BW
- be able to improve the usability of your U4BW system across all core module (note, the course does not include HR & Payroll)

The key benefits of attending this course are:

- Improved staff efficiency and productivity
- Internal knowledge on how the system has been configured and developed
- A lower cost if you are empowered to enhance your own system in the future
- Continuous improvement of processes and adaptation to change

Training schedules

For course bookings, please call 01628 637266 or email info@williamswoodward.co.uk.
