

A brilliant solution for forward thinking companies

Ease your workload and your costs

williamswoodward has chosen Xledger software as our business system of choice and other smart SMEs are making the same far-sighted choice.

The Xledger software is a Cloud based accounting and business system; it is affordable, powerful and easy to use, already running successfully in over 3500 customers in Scandinavia. Xledger has been developed by software professionals with more than 10 years' experience of cloud development.

williamswoodward appreciates the vitality of the product, so as well as implementing Xledger software in-house, we are a proud reseller of Xledger.

williamswoodward pride ourselves on the provision of excellent project implementation services and the introduction of Xledger software into our portfolio provides our Xledger customers an opportunity to utilise and benefit from our knowledge and expertise of implementing ERP systems.

Experience. Excellence. Excitement.

A truly scalable Cloud Based Business System designed from the ground up. Delivered as a SaaS (Software as a Service) application, Xledger has the ability to make a tangible difference to forward looking businesses.

An excellent tool to help streamline the finance and accounting functions for medium sized dynamic businesses looking for tight control of their finances and projects; Xledger provides an instant view of the business position and making information readily available for all users.

- Accurate project profitability – track projects true costs and billing
- Achieve greater visibility and understand the true performance drivers in your business
- Ideal for service and project based organisations
- Reporting by exception reduces time spent tracking anomalies, makes auditors happy

Easy to Use

The screenshot displays the Xledger software interface. At the top, there is a navigation bar with the Xledger logo, 'Demo' text, and 'Williams Woodward Limited'. Below this is a user profile bar for 'Andrea Williams (Employee) : Project'. The main dashboard is divided into four columns: 'Project', 'Timesheets', 'Resource planning', and 'Project income'. Each column contains several interactive tiles with icons and labels: 'Timesheet enquiry' (Project), 'My timesheets', 'My timesheet entry per day', and 'My project plan' (Resource planning), 'My periodic timesheet entry', and 'My timesheet codes' (Timesheets), 'Timesheet per project', and 'Timesheet report per employee' (Timesheets), and 'Protect expenses' (Project income).
